Die & Tool China 2021 第二届中国国际金属成形工模具展览会

In response to the urgent requirements of the audience and exhibitors, Die & Tool China was established in "MetalForm China". This exhibition will become an important part of "MetalForm China", one of the six sub exhibitions. There is no doubt that forging, stamping and sheet metal enterprises are using die and tooling, and the die and tooling is an important support for the development of precision, efficient and green manufacturing in the three industries. Most of the forging, stamping and sheet metal technologies are in tool and die technologies. The Die & Tool China is not only the tool and die display, but also the display of technology and equipment such as process and tool, tool and die design, tool and die manufacturing and applying technology, as well as technology and equipment such as material and process optimization. Forging, stamping and sheet metal tooling and die cannot be simply regarded as "tooling", but actually a very precise "machine", which requires unique technology and know-how in design, manufacturing and operation. Die & Tool China will contribute to the progress of die materials, design, manufacturing and application technology.

应广大观众和展商的迫切要求，在“中国国际金属成形展览会”中创立中国国际金属成形工模具展览会。本展览会必将成为“中国国际金属成形展览会”的重要部分，六大子展之一。毫无疑问，锻造、冲压和钣金制作企业都在使用工模具，而工模具是三个行业发展精密、高效和绿色制造的重要支撑。锻造、冲压和钣金制作工艺技术中的大部分是工模具技术，工模具展不仅仅是模具展示，重要的是展示工艺与工模具、工模具设计、工模具制造与使用等技术装备，同时也涉及材料、加工工艺优化等技术装备。锻造、冲压和钣金制作用工模具不能简单地将其看做“工装”，实际是一台（套）非常精密的“机器”，在设计、制造和使用中需要独特的技术和技术诀窍。中国国际金属成形工模具展览会必将为模具材料、设计、制造和使用技术的进步做出贡献。
